Software Technology Park, Gwalior

2

1 Lakh square feet space on long lease ready to occupy in Gwalior

6000 square feet of data center space tier IV for long lease available for investment to private sector in Bhopal

## State Interventions

The department is contemplating to attract IT companies into the State through following initiatives

- ❖ Creation of adequate built up space for lease or purchase.
- ❖ Providing quality man power as the state has vast and untapped manpower ready to work in this sector.
- ❖ Creation of IT infrastructure matching Global standards.
- ❖ Improving the connectivity – International Airports on the anvil.
- ❖ Promoting high class educational facilities.
- ❖ Rapid modernization and providing world-class facilities.

It is estimated that in coming few years the IT and BPO companies would require man power exceeding over a million to cater to their growing needs. These requirements are more likely to be filled in by the tier II and III cities as the metros have already reached the saturation in terms of cost / manpower availability.

# Thank You
